Berkeley, CA

Profile

Web Developer with over two years of professional experience working with HTML, CSS, JavaScript, PHP, and MySQL. Experienced in working both independently and collaboratively, with a focus on website design and development.

Experience

Food Manager - Berkeley Student Cooperative   Aug 2021 - Ongoing
- Manage a $76,000 semesterly food budget for a house of 124 individuals.
- Train seven teams of five cooks each to provide daily meals for members of the cooperative.
- Purchase and receive shipments of food five days a week, following all food safety and storage standards.
- Built, introduced and maintained a weekly menu website that allows residents to be up to date on what they will be eating each week.

Front End Developer - Freelance   Jun 2022 - Ongoing
- Designed and implemented fully responsive static websites using Figma, HTML, SCSS, and JavaScript.
- Set up a workflow making use of Git and GitHub, setting up both staging and production servers utilizing Github Pages.
- Established ongoing communication with clients to evaluate their needs, and set project and timeline expectations.

Full Stack Developer - Motus Guadalajara   Jun 2018 - Jan 2021
- Designed and implemented fully responsive websites and web systems using HTML, CSS, JavaScript, PHP, and MySQL.
- Helped Motus modernize the ways in which they designed software architecture by introducing the use of REST API's, helping them follow separation of concerns in their future projects.
- Collaborated with other team members to help maintain legacy projects and add or update features as needed.
- Established ongoing communication with customers and coworkers in order to design systems that met established requirements and changing customer needs.

Full Stack Developer - CS169L Software Engineering Project   Jan 2022 - May 2022
- Collaborated with a team of 5 other students to design and implement a fully responsive web application for the Berkeley Student Food Collective using Figma, HTML, Bootstrap, and Rails.
- Set up an Agile workflow making use of Git, Github, and Pivotal Tracker, setting up both staging and production servers utilizing Heroku.
- Lead and participated in weekly team meetings with clients to continually evaluate their changing needs and set expectations for each iteration.
- Participated in short daily team meetings to discuss and set project goals for the iteration.
